Organization Profile

Introduction:

The Integrated Development Society (IDeS) is a non-profit organization that works to improve the socio-economic conditions of marginalized communities in Dadeldhura district, Nepal. IDeS was registered under the Institution Registration Act in 2003 (2060BS) and is affiliated with the Social Welfare Council. The organization implements various programs to raise awareness and generate sustainable income for Dalit, Indigenous, women, children, and other disadvantaged groups in the district. IDeS has a strong reputation for working with communities in a participatory and transparent way, with clear mission, vision, goals, values, and objectives that are aligned with local needs and context.

Vision Mission, Goals and Objectives

Vision: The IDeS program aims to create an **equitable society** by aligning with the central principle of the SDGs to 'Leave No One Behind.' The program specifically focuses on SDG 5, which aims to achieve gender equality and empower women and girls, as well as SDG 10, which aims to reduce inequality. The goal of the program is to empower the most disadvantaged groups, particularly women, people with disabilities, and other vulnerable groups, by increasing their socio-economic capacity and building and maintaining inclusive institutions and systems

Mission: Our mission is to enhance the capacity of disadvantaged groups, women, children, and the most vulnerable in Surpaschim Province and Dadelhdura, with a focus on empowering them through education, health, and economic services. This is in response to the facts of poverty, lack of education, inadequate health services, and economic challenges in these areas.

Goals: The organization focused on health education and economic opportunities for woman children, disadvantaged groups aligning to our vision and mission. Therefore, our goal is to achieve improved economic opportunities of women, children, and other intersectional vulnerable groups along with quality education and improved health system in place. We believe on SMART (Specific, measurable, achievable, realistic, and time-bound) process while achieving the goals.

Values:

IDeS believes on transparency, participation, social justice, equity, creativity, and mutual learning.

Transparency is crucial to the success of our programs and is essential for the organization as a whole. Social justice forms the foundation of our values, and it is important that target communities, staff at all levels, and members of organizations are involved in the design, implementation, and evaluation of programs. In addition, equity is vital for freedom of expression and for lifting up the poor and vulnerable. Our organization places a priority on creative, useful, and understandable ideas to drive better outcomes. Furthermore, we believe in embracing change, continually learning, and being adaptable to varying contexts.

Objectives: IDeS have following objectives aligned with mission, vision, goals, and values.

1. To reduce the mortality rate of women and children caused by communicable diseases, the organization will promote nutrition, sanitation, health education, reproductive health, diarrhea control activities, and the promotion of healthy manpower.
2. To increase self-employment among excluded groups such as Dalits, Indigenous people and women through skill development.
3. To promote the livelihoods of communities through the appropriate use of natural resources and diversification income generation activities.
4. To establish disaster resilient society through improved preparedness, response, and recovery, as well as through climate change adaptation.
5. To ensure human rights to the excluded vulnerable families of communities through capacitating them to voice their issues and advocacy activities.

The Features of IDeS

IDeS is a women-led organization established to address reproductive health issues, advocate against gender-based violence, and conduct health campaigns. The organization aims to improve the economic

status of pregnant and lactating women from vulnerable families through more than a decade of experience and quality social work. Therefore, IDeS clearly possess the following as specific features:

- Organization is lead by the members from Indigenous and women
- High participation of women in executive and general member positions and board is encouraged from the beginning. There are more than 90% women in organization board.
- A lead organization focusing on reproductive health, advocating against gender-based violence, and conducting health campaigns.
- Improving the economic status of pregnant and lactating women from vulnerable families through awareness and capacity buildings.
- IDeS ensure equal and meaningful representation of all classes, including women, Dalits, and minorities, in executive board and staff.
- The organization has a community-based and group-based participatory approach for program development and interventions.
- IDeS has developed its capacity to work on diverse kind of the needs in community.

Along with these best practice IDeS have developed itself as strong organization having institutional capacity both at operational and programmatic level in diversified thematic interventions. Diversification livelihood, Climate Change Adaptation, Disaster Resilience Program, high involvement of municipal and district level planning process of DRM has been emerged as strong program niche. With aim of achieving our organizational goal, IDeS will work on program development in line with LNOB, SDG Goals, DRR Strategic Plan of Action 2018-2030, and other relevant framework that has been followed by country.

Strengths of IDeS

We would count our strengths in terms of our assets as following:

- a. **Thematic expertise:** IDeS has developed a strong reputation as a leader in the field of integrated development, with a focus on disaster risk reduction, climate change adaptation, and community development. Through its extensive experience and partnerships with reputed development organizations such as Mercy Corps, USAID, and Oxfam, IDeS has built a team of skilled professionals with expertise in a wide range of areas. The organization has a particular focus on strengthening the resilience of communities and ensuring that they have the necessary capacities to respond to disasters and other challenges. Additionally, IDeS has a strong commitment to empowering women and other marginalized groups, and works to promote gender and social inclusion in all of its programs and activities. With its solid reputation and proven track record, IDeS is well positioned to continue making a positive impact in the communities it serves, and to lead the way in creating a more sustainable and resilient future for all.
- b. **Human resource:** The human resource pool of IDeS is outstanding in the region. We are full-fledged not only to deliver the service of our projects but we also we have been supplying technical expertise to our sister organizations in the region. We have maintained a diversified set of staff and governing body from the very core technical to the socio-political expertise. Our staffs are well motivated and dedicated to deliver the services in any harsh conditions.
- c. **Network and communication:** We have developed a strong network of local communities throughout the district and the linkage with the national level. We also have a functional communication system with the line agencies, local bodies and service providers. We have been appreciated by the local bodies for our effective service delivery mechanism and ability to produce anticipated outcomes within the limited time and resources.

- d. **Internal governance:** The organization is functional through its legal and policy instruments and they are in place in IDeS. The executive committee is for strategic guidance policy support. The organization is operated through the thematic experts under the leadership of the Executive Director who is appointed by an open competitive process and it is applied for all other staff.

We follow the double entry account system developed by the government of Nepal and the finance is internally audited periodically. Likewise, our organization is audited by an independent auditor annually. The compliances and audit comments are strictly responded and reported to both the executive committee and donor partners. IDeS don't have the dual role of the staff and executive committee. In IDeS, financial management and control responsibilities have been managed by a team with two finance staffs to ensure thorough verification of transactions, documentation, and reporting. Every project has dedicated finance officer to record and proper documentation of evidence of expenditures before the payment. The finance staffs verify every work of finance officer to ensure alignment of organization standard policy and compliances. IDeS has standard practice to carry out external and internal audits of the organization. The Annual General Assembly of the organization appoints auditor through an open and competitive process with announcement of request for sealed proposal. The current auditor has carried two statutory audits of the organization. In addition to the internal audits of each project to be carried out by concerned funding partner on sampling basis (sampling intensity depends on various parameters including risks factors and volume of single transaction), executive board representatives carry out internal audits on sampling basis to identify strengthen and risks areas of financial control and management.

- e. **Coordination:** IDeS boasts a remarkable coordination capacity, both internally and with external stakeholders. The organization is dedicated to preventing fraud and corruption, and actively works to promote these values in its networks and partners. IDeS effectively coordinate with the government, donors, and beneficiaries to ensure that its initiatives are aligned with the needs of the communities it serves. Furthermore, IDeS has strong links with the private sector, particularly cooperatives and enterprises, to promote sustainable livelihood interventions and long-term services for communities. The organization is committed to continuous learning and sharing best practices with its partners, making it a leader in coordination and collaboration.
- f. **Partnership:** IDeS has a strong partnership capacity and has worked closely with a variety of stakeholders to develop strategies and policies at the district level. We are dedicated to collaborating with our clients and taking their input into consideration as we strive to continually improve and learn from our experiences. Additionally, we have a solid partnership with the private sector, cooperatives, and enterprises, which enables us to link communities with sustainable livelihoods and other long-term services.
- g. **Impactful and sustainable programs:** IDeS has a proven track record of delivering impactful and sustainable programs that bring about meaningful and lasting change in the communities it serves. With a focus on disaster risk reduction, climate change adaptation, and community resilience, IDeS has been able to create programs that have a significant impact on the lives of people in Dadeldhura district. The organization has integrated climate change adaptation into its agricultural practices and has components of local capacity building to ensure that the programs are sustainable. IDeS has also established an Early Warning System in the Mahakali riverbank area of Parshuram Municipality, which has enhanced the capacity of the local community to prepare for future floods.
- IDeS works closely with local government and line agencies to ensure effective coordination and collaboration in local-level planning processes. The organization has developed strong

partnerships with private sector entities, cooperatives, and enterprises to link communities with sustainable livelihood interventions and long-term services.

- h. **Strong monitoring and evaluation:** Monitoring and Evaluation is a key strength of IDeS as we prioritize accountability and meaningful participation in our interventions. Our Monitoring and Evaluation guideline provides a clear and sustainable approach and mechanism for monitoring the progress of our programmes. We have a three-stage monitoring and evaluation system that involves monitoring and evaluation at the executive level, program and project level, and activity implementation level. Our reporting system, including Event Reporting, Monthly Reporting, Quarterly Reporting, and Bi-annual reporting, allows us to track and monitor the progress of project implementation. Our strong community monitoring, joint monitoring with boards and stakeholders, and bi-annual Local Project Advisory Committee (LPAC) meetings ensure accountability is at the core of our process. Our commitment to Do No Harm and inclusive feedback mechanisms are key aspects of our Project Cycle Management. Our local presence in networks and forums provides valuable insights into our programs on a regular basis.

IDeS's Policies and Strategy

IDeS are equipped with comprehensive policies and guidelines that has been implemented and followed in each of programs, organizational management, staffs, and boards. Similarly, the organization is in process of development of five-year strategies which will be effective from **2023 to 2028**.

Following are the major Policies and Guidelines of IDeS

1. Human Resource Policy
2. Admin and Procurement Policy
3. Child Safeguarding Policy
4. GESI Policy
5. Monitoring & Evaluation Guideline

IDeS will have the further guidelines and Standard Operating Procedure (SOP), for emergency context. We are in process of developing separate guideline on inclusive Complain and Feedback mechanism (CRM).

□ **Organizational Strategy on Complain and Response Mechanism (CRM):**

IDeS's CRM strategy our existing programs includes collecting feedback from right holders and stakeholders through various means such as community meetings, consultation meetings, DPAC and LPAC, and joint monitoring visits. A complaint and feedback collection committee are established to register and maintain complaints received from the community. These complaints usually reviewed and resolved by a local committee and potentially forwarded to a higher level for further examination. Feedback forms are also be provided to project beneficiaries for regular feedbacks. IDeS already have designated focal persons for the complaint and feedback mechanism, and an executive committee makes decisions on complaints received. The organization will also use to disseminate a toll-free number for funding partners and install complaint boxes in each ward for direct complaints. As a part of the project community members are also be oriented on the existing feedback and complaint process to encourage the participation.

To improve on this existing practice, IDeS will consider implementing an online platform for complaints and feedback to increase accessibility and efficiency. Additionally, IDeS will conduct regular training for staff on handling complaints and feedback effectively and efficiently, and conduct surveys to measure the satisfaction of the community with the complaint response mechanism. IDeS will also consider involving more community members in the complaint and feedback collection committee to increase community ownership and accountability in the process. Additional strategies that IDeS will implement for CRM includes as following:

Anonymous complaints: IDeS will create an option for community members to submit complaints anonymously to encourage more people to come forward with their concerns.

Follow-up and tracking: IDeS will establish a system for tracking and following up on complaints to ensure that they are properly addressed and resolved.

Timely response: IDeS will establish a standard response time for addressing complaints and ensure that staff members are held accountable for meeting that standard.

Communication and transparency: IDeS will communicate the complaint resolution process to the community and provide regular updates on the status of complaints to increase transparency and trust in the system.

Root cause analysis: IDeS will conduct a root cause analysis of complaints to identify underlying issues and develop solutions to prevent similar complaints in the future.

Continuous improvement: IDeS will conduct regular evaluations of the complaint response mechanism to identify areas for improvement and make necessary adjustments to the process.

Community engagement: IDeS involve community members in the CRM process by creating opportunities for them to provide feedback and suggestions for improvement.

Monitoring & evaluation: IDeS conduct regular monitoring and evaluation of the complaint response mechanism to assess its effectiveness and identify areas for improvement.

Grievance Redressal: IDeS establish a grievance redressal mechanism in order to address the issues raised by the community in a more formal and structured way.

These are just a few examples of additional strategies that IDeS consider. The specific strategies that IDeS choose to implement will depend on the unique needs and challenges of the IDeS program areas.

Programmatic Focus area of organization:

Since establishment of IDeS in 2003, we have strengthened our capacity on Disaster Risk Reduction, emergency response, Climate Change Adaptation, support on local planning along with its other thematic area of working e.g. community health, social justice and economic empowerment. From date of establishment IDeS already have implemented 25 programs. These programs are key of organization to strengthen the capacity in the sectors like education, disaster risk reduction, emergency response, climate change adaptation, WASH, Livelihood and advocacy and governance. From 2023 onwards, building on our existing capacities and experiences following thematic areas will be strategically planned by our upcoming strategy 2023-2028.

□ Advocacy and Governance:

Integrated Development Society (IDeS) has implemented Local Governance and Community Development Program (LGCDP) in 19 previous village Development Committees and one municipality in Dadeldhura. The organization has supported district-level planning through the LGCDP program, and has also worked intensively in the field to raise awareness and advocate for issues such as the eradication of chaupadi in western Nepal and women's rights. Since the

establishment of the federal system in Nepal, IDeS has been regularly supporting the development of municipality periodic execution plans and capacity building for government officials. Additionally, IDeS have provided capacity building support to various Community-Based Organizations (CBOs) through facilitator training.

IDeS has also been actively involved in advocacy and governance efforts, which includes the establishment of Women Centers, the formation of women's groups and creation of watch groups against Gender-Based Violence (GBV). Similarly, IDeS has conducted Public Audits, Social Audits, and MCPM Health Sector Social Audits. The organization has also worked on food security governance in partnership with Oxfam in Nepal and has conducted advocacy efforts against chhaupadi and for child rights and education for vulnerable families. Additionally, IDeS has advocated for the inclusion of vulnerable groups in government planning and has worked to raise awareness on need for local government to develop Climate Change Action Plans and Disaster Preparedness and Response Plans. Through these efforts, IDeS has capacitated local governments and communities through mock drills relevant to different disasters and evacuations. Building on its existing experience and strategies in governance and advocacy, IDeS will consider implementing the following innovative approaches:

Community-led Advocacy: IDeS will focus on empowering community members to take the lead in advocacy efforts by providing training and resources to support them in identifying and addressing local issues. This approach would enable community members to take ownership of their own development and advocate for their needs more effectively.

Youth Empowerment: IDeS could also focus on empowering and engaging young people in governance and advocacy efforts. This could include creating youth-led advocacy groups, providing training and resources to support youth-led initiatives, and involving young people in decision-making processes.

Digital Advocacy: IDeS will leverage technology to support advocacy efforts by creating digital platforms for communities to share information and mobilize support. This could include using social media and other digital tools to disseminate information, mobilize support and amplify the voices of marginalized communities.

Collaborative Advocacy: IDeS will also form and strengthen the partnerships with other organizations and stakeholders to maximize the impact of advocacy efforts. This could include working with local government officials, other NGOs, private sector companies, and civil society organizations to advocate for change.

Evidence-based Advocacy: IDeS will emphasize the research to generate evidence on the key issues facing communities and use this evidence to inform advocacy efforts. This would enable IDeS to make more informed decisions and advocate for change in a more effective manner.

By incorporating these innovative approaches into its governance and advocacy strategy, IDeS will be better equipped to address the needs of communities and create long-lasting positive change.

□ **Climate Change Adaptation and Disaster Risk Management:**

IDeS, since its establishment has been working in the areas of Disaster Risk Reduction, emergency response, Climate Change Adaptation, local planning and other thematic areas like community health, social justice and economic empowerment. IDeS have implemented 23 programs with 9 on

disaster risk reduction and 7 on community resilience, integrating climate change adaptation in agricultural practice and local capacity building. Currently, they are implementing the PANNI project and “**Managing Risk Through Economic Development**” with support from USAID and Mercy Corps respectively. IDeS has also established an Early Warning System in the Mahakali riverbank area. IDeS have partnerships with reputed development organizations and have improved their internal controls system to meet funding partner expectations. IDeS has technical and managerial capacities in DRM, CCA, flood response, resilient livelihoods, governance, gender, and social inclusion. Key projects that boosted their technical competency are those supported by Save the Children, UNICEF, OXFAM, Mercy Corps, and USAID. IDeS has been regularly engaged in local level planning process through coordination with local government and line agencies.

As a part of organizational strategy, a Climate Change Adaptation (CCA) and Disaster Risk Reduction (DRR) there will IDeS stands on responding to the increasing vulnerability of Sudurpaschim Province to the impacts of climate change and disasters such as floods, landslides, fire, and earthquakes. The strategy aims to strengthen the resilience of communities in the district, enhance the capacity of local government and communities to implement adaptation and DRR measures, and promote a comprehensive and integrated approach to climate change adaptation and DRR planning and implementation.

IDeS will implement the strategy through a multi-stakeholder approach, engaging local government, communities, civil society organizations, and development partners. The strategy will be based on two pillars: Climate Change Adaptation and Disaster Risk Reduction. IDeS will work with local government and communities to mainstream climate change considerations into development planning and support the implementation of practical adaptation measures, as well as enhance disaster preparedness and response capacities. The organization will also promote inter-agency collaboration and coordination, with a focus on the most vulnerable and marginalized communities. IDeS is committed to working with local government, communities, and development partners to enhance the community of Dadeldhura and surrounding districts.

□ **Water Sanitation and Hygiene (WASH)**

IDeS has been actively involved in implementing Water Sanitation and Hygiene (WASH) initiatives in the community. They have established 50 community water supply schemes, including 75,000 big schemes and 6 solar lifting schemes that cover 800 households. They have also established 300 households with MUSH facilities, and provided emergency WASH support during diarrhea outbreaks. In addition, IDeS have implemented WASH initiatives in 15 schools, including toilets and water schemes, and have constructed household level toilets in 5 VDCs for 12,000 households. IDeS have also declared 19 VDCs to be Open Defecation Free (ODF) and has played a leading role in this effort. During the COVID-19 pandemic, IDeS provided quarantine support and food attribution to 2500 households, and also supported persons with disabilities with food and health safety kits. They also provided medical equipment, tarpaulins, masks, and sanitizers to the community during the COVID-19 response.

Based on these experiences, IDeS will continue to focus on providing WASH services to communities in need with more reach to the unreached communities. These will be achieved through the following strategies:

Expansion of Community Water Supply Schemes: IDeS will work to expand the number of community water supply schemes in the area, ensuring that all households have access to clean and safe drinking water. The ex-haliya communities and dalit communities are deprived of proper WASH facilities in districts, therefore, our priorities will be to reach and serve the those right holders who are in most needs.

Provision of Emergency WASH Services: IDeS will continue to provide emergency WASH services in times of need strengthening existing capacities, fitting to the all disaster context like outbreaks of diseases like diarrhea, pandemics, flood, landslides and earthquakes.

WASH in Schools: IDeS will continue its experience of WASH in schools with increasing the number of schools reach with WASH facilities, ensuring that students have access to clean water and proper sanitation facilities.

Promotion of Hygiene and Sanitation: IDeS put its efforts to raise awareness about the importance of hygiene and sanitation, promoting the construction of household-level toilets and encouraging people to use them. In this regard we will work through Female Community Health Volunteers (FCHV) because, they have very good reach to community with capacity to provide the community level health and WASH facilities when required.

Accessible WASH Service: IDeS is committed to ensuring that all communities, including persons with disabilities, have access to safe and reliable WASH services. The organization's strategy is designed to address the needs of persons with disabilities, promote inclusive WASH services and improve the overall quality of life for communities.

Collaboration with Local Government and Line Agencies: IDeS will strengthen the collaboration with local government and line agencies, with technical assistance engagement and support to implement WASH programs effectively.

Sustainable Funding: IDeS will explore and secure sustainable funding sources to ensure the continued delivery of high-quality WASH services.

By implementing these strategies, IDeS will continue to make a significant impact in the WASH sector and provide communities with the essential services they need to live healthy and dignified lives.

□ **Education**

IDeS has reached out to 25 schools in the Dadeldhura district previously through different programs, providing education and life skills support to students in these communities. IDeS will continue to expand its reach and impact in the education sector, working with schools, communities, and government bodies to ensure that all children have access to quality education.

The strategy of IDeS on education sector is to provide accessible and inclusive education to all children, particularly those who are vulnerable, such as school dropouts or those with disabilities. IDeS aims to provide a comprehensive approach to education by not only providing education materials and scholarships but also offering life skills training to students. This approach will help students not only excel academically but also develop critical life skills that will enable them to lead productive and fulfilling lives.

One of the key components of IDeS' education strategy is to provide scholarships to underprivileged children and those who have dropped out of school. This will help them continue their education and overcome financial barriers that may have prevented them from completing their studies.

In addition, IDeS also focuses on providing education materials to schools, particularly those located in remote and underdeveloped areas. These materials will support teachers and students in their educational pursuits and enhance the overall quality of education in these communities.

Furthermore, IDeS' education strategy includes providing life skills training to students. This will help students develop essential skills such as problem-solving, critical thinking, and effective communication. These skills will be valuable not only in their academic pursuits but also in their personal and professional lives.

□ **Livelihood:**

IDeS has a strong track record in improving livelihoods of communities in the Dadeldhura district. The organization has contributed to increased agriculture production through providing access to high-quality seeds and breeds. IDeS has also established irrigation facilities in 19 VDCs and 1 municipality, which has helped in improving the productivity of agriculture. The organization has also established micro-enterprises for youths, women, Dalits, and Haliyas, as well as dairy and vegetable farming, poultry farming, and goat farming to diversify the livelihood options for the communities. Additionally, IDeS has worked on promoting cooperatives and business skills, financial literacy, and reached at least 7,500 people through these livelihood interventions.

For future programs, the livelihood strategy of IDeS would be based on the following principles.

- Improving agricultural productivity by providing access to better seeds, breeds, and irrigation facilities.
- Diversifying livelihood options by promoting micro-enterprises, dairy and vegetable farming, poultry farming, and goat farming.
- Promoting business skills, financial literacy, and cooperatives to increase the income of the communities.
- Reaching out to the most vulnerable groups, including women, Dalits, Haliyas, and youths, to improve their livelihoods.
- Continuous monitoring and evaluation of the livelihood interventions to ensure sustainability and impact.

□ **GEDSI and Climate Change Action as cross cutting issues:**

Gender, Disability and Social Inclusion (GEDSI) is a cross-cutting theme in all programs of IDeS, as it is a key component to ensure that the benefits of development programs are inclusive and reach the most vulnerable communities, including women and marginalized groups. In all of its programs, IDeS incorporate GEDSI strategies and activities to ensure that the needs and perspectives of these communities are considered and addressed in an equitable manner.

Climate Change Adaptation is also a cross-cutting theme in all programs of IDeS, as the organization recognizes the significant impact that climate change is having on communities, particularly in terms of increased vulnerability to natural disasters and a reduction in food security. In all its programs, IDeS incorporate activities and strategies aimed at addressing the impacts of climate change and helping communities to adapt to the changing environment. This includes promoting sustainable land use practices, promoting climate-resilient livelihoods, and strengthening local governance and disaster management capacities to respond to the challenges posed by climate change.

Experience and Major Achievements

Highlights: Since establishment of IDeS in 2003, we have strengthened our capacity on diversified themes such as Disaster Risk Reduction, Climate Change Adaptation, WASH initiatives, education, livelihood, advocacy, governance and community health programs. DeS has implemented the Local Governance and Community Development Program (LGCDP) in 19 villages and 1 municipality, providing capacity building support to government officials, Community-Based Organizations (CBOs), and local communities.

IDeS has been working in the areas of Disaster Risk Reduction and Climate Change Adaptation by implementing 23 programs that integrate climate change adaptation in agricultural practices, emergency response, and local capacity building. They have established partnerships with reputed development organizations and have improved their internal controls system to meet funding partner expectations. In the WASH sector, IDeS has established community water supply schemes, household level toilets, and provided emergency WASH support during outbreaks. In the education sector, IDeS has reached out to 25 schools in the Dadeldhura district providing education and life skills support to students. In the livelihood sector, IDeS has contributed to increased agriculture production, established irrigation facilities, and micro-enterprises for youths, women, and marginalized communities.

Here are the Key Achievements on each thematic area IDeS worked on:

Thematic Area	Key Funding Partners	Key Points on Achievements
Livelihood	OXFAM, FCA, CARITAS, IDE, Mercy Corps, DFID	<ul style="list-style-type: none"> • Through effort of IDeS communities has access to high quality seeds and breeds which ultimately contributed on increased agriculture production of farmers. • IDeS have worked intensively on large scale irrigation facilities in Dadeldhura and surrounding district. We have constructed 75 irrigation facilities in 19 VDCs and one municipality of previous government structure. • We have supported on microenterprises for youths, women/Dalit and ex- Haliya. • IDeS was first organization of Dadeldhura to work in dairy sector. We have established milk collection center and worked on market linkage, insurance to the products and services and provided matching support for at least 500 cows for the farmers. • IDeS has been providing technical support and top up support on agri-sectors like vegetable farming, seasonal and

		<p>off seasonal farming, poultry farming, goat farming, piglet farming and other diversified farming practices to improve the productivity and income of farmers.</p> <ul style="list-style-type: none"> • IDeS have worked on Cooperative model so that poor communities can have access to finance through soft loans and collateral free loans. Similarly, we have worked intensively on business plan development of the microenterprises supported and strengthening community capacity through financial literacy classes. At the same time IDeS have worked on strengthening the institutional capacity of cooperatives on financial management, account management, and organizational policy development. All together we have worked with and established 50 cooperatives in district. • Through livelihood intervention IDeS has reached around 7500 people of Dadeldhura district.
Climate Change and DRR	Save The Children, OXFAM/EC, ECHO, Mercy Corps	<ul style="list-style-type: none"> • Disaster Risk Reduction, emergency response, Climate Change Adaptation, support on local planning on DRM are expertise of IDeS. • Out of 26 projects implemented so far, nine projects are on disaster risk reduction and natural resource conservation and seven projects are on strengthening community resilience through diversification of the livelihood options. These programs has integrated climate change adaptation in agricultural practice and also have components of local capacity building on CCA. • Recently we have been implemented PANNI project which covers strengthening local governance, Disaster risk Management and Climate Change Adaptation. • Similarly, we also have implemented “Managing Risk Through Economic Development” supported by Mercy Corps which have boosted our capacity further in DRM, its

		<p>advocacy and community resilience. Similarly, MRED have established Early Warning System in Mahakali riverbank area of Parshuram Municipality with capacity enhancement local to prepared with the future flood in river. Beside these notable experiences in DRR/M, CCA and governance we have been engaged regularly in local level planning process through effective coordination and collaboration with local government and line agencies. IDeS has successfully implemented two ECHO funded project under DIPECHO funding cycle 6 and 7 in partnership with the OXFAM.</p> <ul style="list-style-type: none"> • In terms of Climate change mitigation –IDeS has worked on recharge of water source protection and rainwater harvesting. • Practice of poly house, drip irrigation, solar water lifting are some notable adaptation intervention we have practice together with community awareness and municipal level advocacy on climate change impact. • IDeS has been raising voice to the local government authority DRR planning process, advocacy. • Networks: NYCA, DP Net, Education Watch Groups/ right to food groups are some networks IDeS engaged and actively participated. These are the forums for IDeS on Climate Change and DRR advocacy.
Community Health (Safe Motherhood, Reproductive Health) and nutrition	UNFPA, Action Aid, CECI	<ul style="list-style-type: none"> • IDeS hasWorked with women groups, awareness and empowerment, stretcher and decision making at household level, health preparedness and rights, • We worked for specially women’s health right specially to those suffering from patriarchy discrimination, GBV, Chhaupadi Pratha and health problem faced by women by these discriminations like reproductive health problems. Therefore, we worked on safe rooms and women privacy maintenance as well.

		<ul style="list-style-type: none"> • IDeS have worked on capacity strengthening of Health institution in terms of inclusion, reproductive right and facilities to the health institutions, menstruation hygiene and Chhaupadi Pratha. Through our health programs we have reached to 10 health institutions of Dadauldhura district. • IDeS have reached out at least 6000 people through 271 women groups from five VDCs of previous structure. • Similarly, we have supported communities with Improved Cooking Stoves (ICS) contributing on women's health through less smoke during cooking.
WASH	OXFAM, RVWRMP/FINIDA, ADB, Fun Board, UNICEF, IDE, HELVETAS	<ul style="list-style-type: none"> • IDeS has established 50 Community Water Supply Schemes from which 75000 community peoples are benefited from big schemes. • With innovative approach we have installed six water supply schemes using Solar lifting technology from which 800 HHs are directly benefited. • IDeS has also worked on Emergency WASH, during diarrhea outbreak. • We have worked on School WASH program reaching to 15 schools where we have constructed 15 school toilets and water supply schemes for schools. • IDeS have constructed Household level toilet in five VDCs of previous governing structure from which 12000 households are benefited. This has contributed on Open Defecation Free (ODF) declaration in 19 VDCs of previous governing structure. The ODF declaration was led by IDeS in collaboration with other stakeholders in district. • During COVID-19 Response –IDeS has carried response with quarantine support, food Distribution to 2500 households, and persons with disabilities supported with food and health safety kits. Similarly, medical Equipment,

		Tarpaulin, Mask Sanitizer,
Education	FCA, UNESCO,	<ul style="list-style-type: none"> • IDeS has implemented education-focused programs in Dadeldhura district, reaching 25 schools. • The organization has provided scholarships to support student education and provided educational materials. • The education program area also focused on life skills development for students, especially those who have dropped out of school. • IDeS have worked towards connecting these students with livelihood opportunities to keep them in school. • The education programs have integrated gender and social inclusion, ensuring equal access to education for all. • IDeS have collaborated with local government and line agencies to support the education sector in Dadeldhura. • The organization has worked with reputed development partners such as UNICEF, Save the Children, OXFAM and others to further strengthen their efforts in the education sector.
Governance	ULE/GTZ, DFID, CECI	<ul style="list-style-type: none"> • IDeS has implemented Local Governance and Community Development Program (LGCDP) in 19 VDCs and 1 municipality • Supported district-level planning and advocacy for issues such as the eradication of chaupadi and women's rights • Regularly supported the development of municipality periodic execution plans and capacity building for government officials • Provided capacity building support to various Community-Based Organizations (CBOs) through facilitator training • Intensive work in the field to raise awareness for important issues

		<ul style="list-style-type: none"> • Support for government officials in the implementation of federal system in Nepal <p>IDeS is focused on empowering communities through improving governance in Dadeldhura and surrounding district.</p>
Advocacy	EU, FCA, OXFAM	<ul style="list-style-type: none"> • IDeS have been advocating to raise voice against ChaupadiPratha, • IDeS is working on resettlement of Dalit and freed haliyas, their improved livelihood together with strengthening the women leadership capacity in the community. • We have been regularly organizing the advocacy events against Gender Based Violence (GBV) in community, raising voice with local government top address the issues. We are working as watch dog for effective implementation of government plans and programs. In recent time DRR and climate change related advocacy are regular part of our program for example; advocacy to prepare Disaster Preparedness and Response Plan (DPRP) and Local Adaptation Plan of Action (LAPA). • IDeS is also advocating for child right, specially their right to go to school specially from Ex-Haliya and Dalit community. With support from our program, child clubs are formed and mobilized in community.

IDeS has Major Running Programs as following:

SN	Project and Duration	Donor	Program area	Activity	Fund (NPR)
